Laura

My gut says to respond that I have no emails....but would an email from Steven Way to me about Red & Bonita constitute a record?

Hello John,

Thank you for all that information. I will have the Records Center get involved for what you describe. I need to know if you have emails or any other correspondence pertinent to the request, and an estimate of the time it would take to pull that together.

Thank you,

Louise

Carol

I've spent about 3 hours doing preliminary checks for FOIA documents. I do not know that all of these documents are relevant.....but they are within the time frame, when a time frame was given. To read each of the documents and determine their connection to Sunnyside Gold would take considerable amount of time.

About the only way to gather such a list was to look at "anything of potential relevance" within the time frames. This is what I found.

Upper Animas...topic Water Quality...no time frame.....130 docs in CERCLIS(our of 3.467 total docs)

US Smelter...after Jan 14, 2013.....0 docs in CERCLIS

1 website

Mayflower.....open date.....97 docs in CERCLIS

Cement Creek....after Jan 14, 2013.....9 docs in CERCLIS

Red & Bonita.....after Jan 14, 2013.....26 docs in CERCLIS

3 docs on website

That is a potential 266 documents.....just guessing, I could call up and print 10 20-page documents in an hour....that would take me or the ASRC 27 hours, plus paper costs. It took me about 3 hours to get to this point. There exists a strong possibility that other less known mining sites are in the area....I only know that Red & Bonita should be relevant....the area is a mining district.

Hello all,

Attached is a request letter from Sunnyside Gold Corporation asking for records from the EPA. Please read the letter and the 9 specific sets of documents being requested. I will contact you during the next few days to find out whether you have responsive documents and an **estimate of the time needed to search and locate them**. This includes all emails.

Please do not start any work on this FOIA. We must first determine the cost for such a broad request so that the requester can approve and prepay for this information.

If you prefer to respond by email, that works for me.

Thank you,

Louise Jensen
